From: Dan Lipcan, Task Force on Relationship Designators in RDA Appendix K

Subject: Task Force Report and Appendix K Revision Proposal

Charge: Propose changes to the list of relationship designators in RDA Appendix K to enrich the vocabulary used to specify relationships between persons, families, and corporate bodies. The task force should review the relationship types used in the Union List of Artist Names and any other relevant vocabularies.

Task Force members: Dan Lipcan, Robert Maxwell, Randy Roeder, Adam Schiff, Kathy Winzer, Bob Wolverton.

The Task Force has incorporated recommendations and suggestions provided by CC:DA members, representatives and liaisons during the 2012-2013 American Library Association meetings and online.

Background and notes on the proposal:

The Appendix is subdivided into sections as a navigational aid, in order to collocate together the appropriate designators for a given entity-entity relationship (e.g., relationships between persons and corporate bodies).

Some relationship designators are not specific to persons, families or corporate bodies. These “general” designators can be applied to more than one type of relationship and are repeated, with a generalized definition, in multiple subsections throughout the proposal. Note that in some of these cases, the relationship designator and its reciprocal are identical.

The present tense was implied in constructing this list of terms, but the use of the past tense to describe a relationship is not prohibited.

Cross references to sections listing reciprocal relationship designators have been added to the introductory statements of each section.

Upcoming and/or anticipated proposals/additions to Appendix K:

Several suggestions and additions were presented too late in the process to incorporate into this proposal. We expect the following to be presented in the near future as additions to the Appendix, via fast track or formal proposal.

- A CC:DA Task Force to investigate RDA instructions pertaining to pseudonymous names of corporate bodies and families was authorized at the 2013 Annual meeting. It is very likely that “alternate identity” and “real identity” will be generalized throughout the Appendix like “associated with.” Currently these designators are listed only in the persons to persons section K.2.1.1.
- Families that change names: “preceding family” and “succeeding family.”

- Person-animal relationships: “pet owner” and “pet owner of.”

Proposed revisions

Editorial note: Because this is a complete revision of Appendix K, it is presented with only limited mark-up. All changes are highlighted in yellow; deletions are indicated by ~~strike-through~~, but additions other than examples are highlighted, but not underlined (except in a few cases).

APPENDIX K :

Relationship Designators: Relationships Between Persons, Families, and Corporate Bodies

K.0 Scope

This appendix provides general guidelines on using relationship designators to specify relationships between persons, families, and corporate bodies, and lists relationship designators used for that purpose.

~~The relationship designators in this appendix are provisional. They will be reviewed and revised as necessary.~~

K.1 General Guidelines on Using Relationship Designators

The defined scope of a relationship element provides a general indication of the relationship between persons, families, and corporate bodies (e.g., related person, related corporate body). If the relationship element is considered sufficient for the purposes of the agency creating the data, do not use a relationship designator to indicate the specific nature of the relationship.

Relationship designators provide more specific information about the nature of the relationship (e.g. alternate identity, predecessor).

Use relationship designators at the level of specificity that is considered appropriate for the purposes of the agency creating the data. For example, the relationship between a person and the family descended from that person can be recorded using either the specific relationship designator *progenitor* or the more general relationship designator *family member*.

If none of the terms listed in this appendix is appropriate or sufficiently specific, use another concise term to indicate the nature of the relationship.

K.2 Relationship Designators for Related Persons
